1. Overview

(Fig.1)

The *HOLUX* GPSIm236 Wireless Bluetooth GPS Receiver (Fig. 1) is a total solution GPS receiver with Bluetooth, UART interface and built-in rechargeable battery for high sensitivity to tracking signal. GPSIm236 design is based on SiRF Star III low power Architecture.

GPSI 236 is a dual-function GPS receiver. Not only transmit satellite information through the PDA or Notebook with Bluetooth interfaces but also is a G-Mouse GPS receiver through a data cable to deliver satellite signal to the device without Bluetooth interface.

This positioning application meets strict needs such as car navigation, mapping, surveying, security, agriculture and so on. Only clear view of sky and certain power supply are necessary to the unit. GPSIm 236 contacts to other device through Bluetooth device, compatible interface of RS-232 or USB, and built-in recharge battery to save satellite information such as the status of satellite signal, the last location, date and time of last use.

With low power consumption, the GPSIm 236 tracks up to 20 satellites at a time, re-acquires satellite signals in 100 ms and updates position data every second. Trickle-Power allows the unit operates a fraction of the time and Push-to-Fix permits user to have a quick position fix even though the receiver usually stays off.

2. Packing List

Congratulations on your purchase of the GPSlim236 GPS Receiver. We hope it will be useful to you for a long time. Before you begin, make sure that your package includes the following items. If any of these items are missing, please contact your local HOLUX dealer or distributor.

HOLUX GPSIm 236 Wireless Bluetooth GPS receiver 1 Set

| • | Travel power supply / Cigarette adapter | 1 Set |
|---|---|---------|
| • | Manual and Driver CD | 1 Piece |
| • | GPSIm 236 Quick guide | 1 Piece |
| • | Warranty card | 1 Piece |

3. Main functions

GPSI provides a series of functions. It is well suited to system integration and users who use PDA, Notebook PC with Bluetooth device.

- Built in SiRF Star III Low power consumption chipset.
- 20 parallel satellite-tracking channels for fast acquisition and reacquisition.
- High speed signal acquisition using 200,000 time/frequency search channels.
- Built-in WAAS/EGNOS Demodulator without additional any hardware. Or use the high-sensitive software to get the fast acquisition and reacquisition in the urban, canyon and foliage environments.
- Compatible with Bluetooth Serial Port Profile (SPP) completely.
- Low power consumption. Built-in rechargeable and changeable Lithium-ion battery without external power supply, and the working time lasts at least 10 hours.
- Provide Continue mode and Power saving mode for user's requirement.
- Provide expand terminal contact to other system without Bluetooth device.
- Built-in rechargeable battery for memory and RTC backup and for fast Time To First Fix (TTFF).
- Support NMEA0183 v2.2 data protocol and SiRF binary code.
- 4 colors LED to show the status of device.
- Active antenna connector for getting better satellites signal.
- FLASH based program memory. New software revisions upgradeable through serial interface.

- Small, sleek, and lightweight design easily fits in your hand.
- Over-Temperature protection
- Enhanced algorithms -SnapLock and SnapStart provide superior navigation, performance in urban, canyon and foliage environments.
- For Car navigation, Marine navigation, Fleet management, AVL, Personal navigation, Tracking System, and Mapping device application.

4. Technical Specification

4.1. Basic Specification

- Chipset : SiRF Star III chipset.
- Channels : 20 parallel satellite-tracking channels.
- Frequency : 1575.42 MHZ.
- Receiver : L1, C/A code.

4.2. Acquisition Time (averaged)

- Reacquisition : 0.1sec.
- Cold start : < 42 seconds.
- Warm start : < 38 seconds .
- Hot start : < 1 seconds

4.3. Receiver Accuracy

- Normal : 5-25 meters CEP without SA.
- Enable EGNOS or WAAS :
 - Position: < 2.2 meters, horizontal 95% of time
 - < 5 meters, Vertical 95% of time
- Velocity : within 0.1 meters / second
- Time : 1 microsecond synchronized GPS time

4.4. Use Limitation

- Altitude : < 18,000 meters (60,000 feet)
- Velocity: : < 736 meters/ second (1000Knots)
- Acceleration : 4 G.
- Jerk: 20 meters / second, max

4.5. Power Supply

- External Voltage: 5VDC +/- 10%
- Batteries :

Main Power: Built-in rechargeable Lithium-ion for system power.

Backup Power: Rechargeable Lithium-ion battery for memory & RTC backup.

• Working voltage: 75-85mA (Normal mode).

30mA (Power Saving).

- Working period (In Battery full power status):
 - > 10 hours on Continue mode.
 - > 16 hours on Power Saving mode.
- Protection circuit on GPSIm 236 should stop charging the cell when over-temperature condition --50° occurs.

4.6. Output and Interface

Output

I. Output protocol

Baud Rate: 38400 bps

- Data bit : 8
 - Parity : No
- Stop bit : 1
- II. Format. NMEA0183 V2.2 : GPGGA (1time/1 sec), GPGSA (1 time/5 sec.), GPGSV (1time /5 sec.), GPRMC (1time /1 sec.), GPVTG (1 time/1 sec), (GLL, or SiRF binary format for optional).
- III. Datum: WGS84.

• Input/ Output Interface:

- I. Compatible Bluetooth Serial Port Profile (SPP), Version1.1 and class 2(up to 10 meter range).
- II. In/Out Port. GPS signal (Out)/Command(In) with CMOS/TTL Level Mini USB Type B Connector and Cable option :
 - (a) GR230-A1(RS232 data cable)
 - (b) GR230-A2 (USB data cable)
 - (c) GR230-A3 (Mini USB port to PS2 port).

• External Antenna interface:

3.0V input MMCX type active antenna connector

4.7. Physical

- Size : $46.3 \times 67 \times 19 \text{ mm}$
- Weight : < 56 g
- Operating Temperature : -10[°] to + 60[°] (under the un-charging condition);
 Charging Temperature 0[°] to + 45[°]
- Storage Temperature : -20° to + 85°
- Operating humidity : 5% to 95% No condensing

4.8. Other Functions

- Bluetooth frequency: 2.4 ~2.48GHZ
- Bluetooth Input Sensitivity: -80dbm

- Low sensitivity of receiving satellite signal : -189 dBW
- External antenna interface: MMCX
- LED Functions : Indicate Bluetooth status, GPS status, Battery Status and Battery charging status

5. Getting Started

STEP 1. Charge Battery

Please charge battery till LED off for the first time.

Power cable plug in Power cable connect to power socket

Charge Battery

Battery indicator light:

Power too low ------ red LED

Charging ----- green LED

Full or Not in charging -- LED off

STEP 2. Turn on Power

28 8 8

Mini USB power socket

Bluetooth Status -Turn on GPSIm236 power No Searching Bluetooth device Yes Blue LED blinking (1time / 1sec) No Data is transferrina? Yes Transferring... Blue LED blinking Stop data No transferring? (1time / 3 sec) Note: Yes Bluetooth Waiting for Yes Bluetooth reconnection... re-connection. Reconnect Blue LED blinking ΝЬ Bluetooth device? (1time / 1sec)

Some PDAs have to re-open manager for device

GPS Status ---

Put GPSIm 236 in clear view of the sky without any obstruction for better satellite acquiring.

5.1. Hardware Description

1). GPSIm 236 Body description see Fig. 2:

(Fig.2)

2). LED status :

| SYMBOL | COLOR | STATUS | | DESCRIPTION |
|-----------|--------|-----------|-----------------|---------------------------------|
| * | | | 1 times / 1 sec | Search Bluetooth Device |
| 7 | Blue | Blinking | 1 time / 1 sec | Standby Mode |
| Bluetooth | | | 1 time / 3 sec | Transferring Data |
| (27.3 | Red | Light on | | Power too low |
| Battery | Green | Light on | | In charging |
| Dattery | N/A | Light off | | Battery full or Not in charging |
| XX | | Light on | | Acquiring Satellites |
| \sim | Orange | | | |
| GPS | | Blinking | | Position Fixed |

3). Power Switch : Slide Switch.

4). Optional accessories, and connector description, see Fig. 3.

3) External active antenna connector, see Fig. 5 .
 Connector type: MMCX.
 Active power voltage: 3.0V

4) Power Jack & Data Port, see Fig. 6 °
 Jack type: Mating face of 5 pin Mini USB Type B female °
 Pin definition see table 1 °

(Fig.6)

| Tab | Table 1 | | | | | | |
|-----|----------|--|--|--|--|--|--|
| Pin | Pin Name | Signal and description | | | | | |
| 1 | GND | Signal ground, Battery charging ground. | | | | | |
| 2 | VOUT | Unregulated voltage out: 3.6 V max 100mA. | | | | | |
| 3 | TXD | Transmit Data. From organizer to peripheral.(Voltage Level is 3.3V ~ 5.0V). | | | | | |
| 4 | RXD | Receive Data. Form peripheral to organizer.(Voltage level is 3.3V ~ 5.0V). | | | | | |
| 5 | | Positive terminal of DC adaptor that powers the internal charging circuit of Li-Ion battery. The approved power supply is 5.0V +/-5%@1A. | | | | | |

5.2. Software Installation

The following is the steps of software installation to setup on PDA, DELL AXIM with Bluetooth Manager. For other PDA, the steps may be a little different. (Bluetooth Manger is one of popular program used for Bluetooth device)

5.3. Installation of testing program

(GPSViewer.exe is compatible with Microsoft Pocket PC or other operation system alike.)

- 1). Install Microsoft ActiveSync to your PC, refer to your Pocket PC manual for installation procedure, as Fig. 5.
- 2). Setup your Pocket PC cradle to Desktop PC UART port. The Microsoft ActiveSync will detect your Pocket PC automatically.

Setup your Pocket PC cradle to Desktop PC UART port. The Microsoft ActiveSync will detect your Pocket PC automatically, as Fig. 7.

7) Select "GPS Status" to show the satellite diagram like below, as Fig. 14.

6. Optional accessories

GPSIm 236 has many accessories to satisfy customers' requirement see table 2. After using GPSIm 236 with the following accessories, it can transmit message with PDA, Note Book easily.

| Та | bl | le | 2 |
|----|----|----|---|
| | | | |

7. Driver Installation

You can use any GPSIm 236 accessories data cable without installing driver except GR230-A2 USB cable. The following is the steps of installation GR230-A2 USB cable.

7.1 System Requirement

CPU: IBM, Pentium, or other compatible PC. Memory: above 16 MB System: Windows 98/Me/2000/XP

7.2 Installation

- I. Copy entire GPSIm 236 USB folder from CD to hard disk.
- II. Connect GR-230-A2 USB connector to computer without GPSIm 236 GPS receiver. While the computer automatically starts the installation program, please direct the driver to the GPSIm 236 USB folder.

7.3 Important

Verify the COM port to start using your own navigation software.

- I. Click **<Start>** menu, select \rightarrow **<Setting>**, then enter \rightarrow **<Controller>**
- II. After entering **<Controller>**, and select **<System>**.
- III. Select < Device Manager>.
- IV. Find the < Connector(COM & LPT)> and check the Virtual COM Port, which was created by the USB driver.

Please note that the virtual COM port number might be different from every computer. Before using navigation software, please confirm the COM Port numbers created by your computer and provided by your navigation software. Otherwise, the navigating software won't receive the satellite signal, because of the un-match COM Port setting.

8. Warranty

The **GPSI** is warranted to be free from defects in material and functions for a period of one year from the date of purchase. Any failure of this product within this period under normal conditions will be replaced at no charge to the customers.

- GPSIm 236 has built Li-battery inside, please avoid closing high temperature environment or sun shine directly for a long time.
- * User has to return GPSIm236 to HOLUX if the inner Li battery has to be replaced.

| Problems | Reasons | Methods |
|------------------------------------|--|--|
| No position output but | Weak or no GPS signal can be received at the place of GPSIim236 | Connect an external antenna, which locate as a open space to your GPSIm236 and then run GPSViewer Cold start function. |
| timer is counting | At outdoor space but GPS signal is blocked by building or car roof. | Go outdoor and run GPSViewer Cold start function to try again, or connect an external antenna to improve the poor GPS signal. |
| Execute fail | Bluetooth function unstable | Power On/Off GPSlim 236. Re-Start PDA or PC and reference sec 5.2 re-install software |
| Can not turn on the COM port | Install GPSIm 236 incompletely or operate the device is being used with same COM port | Install GPSIm 236 completely or stop other device that is being used. |

Federal Communications Commission (FCC) Statement

15.21

You are cautioned that changes or modifications not expressly approved by the part responsible for compliance could void the user's authority to operate the equipment.

15.105(b)

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

-Reorient or relocate the receiving antenna.

-Increase the separation between the equipment and receiver.

-Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

-Consult the dealer or an experienced radio/TV technician for help.

You are cautioned that changes or modifications not expressly approved by the party responsible for compliance could void your authority to operate the equipment.

FCC RF Radiation Exposure Statement:

This Transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.
